

Green Travel Choices

Highlighting public transport options to guests is a good way to encourage people to travel more sustainably, and it will reward you with GTBS credits too.

Add public transport options to your 'how to find us' or 'links' pages of your website and provide information on activities (walks, cycle hire etc) that are local and don't need cars to do.

The Energy Saving Trust has a good section on its website about travel which includes looking at tips for driving more efficiently and a 'miles per gallon' calculator. More info, [click here](#).

We've written a [GTBS Datasheet](#) (log in details shown below) with information on what to provide about public transport. It includes some excellent transport links. Here are few we like:

- [Traveline](#): all the train, bus & coach services in the UK.
 - [Walk It](#): walking routes for towns in the UK.
- [Sustrans](#): all the official cycle routes in the country.
- [Liftshare](#): matches people looking to share lifts
